

Landscape Horticulturist Level Three

TABLE OF CONTENTS

Version Control	ii
TABLE OF CONTENTS	v
ACKNOWLEDGMENTS	x
PROGRAM OVERVIEW	xi
• ITA Occupational Analysis Chart—Landscape Horticulturist	xii
• Roles and Responsibilities.....	xv
• Program Delivery	xvi
• Program Assessment and Completion Requirements	xvii
• Training Topics and Suggested Time Allocation.....	xviii
• Assessment Guidelines – Level 3	xix
• Tools and Equipment—Supplied by Apprentice	xx
• Reference Material	xx
• Use of Different Units of Measurement in the Learning Resources	xxi
LEARNING RESOURCES	xxiii
 LINE B USE TOOLS EQUIPMENT AND VEHICLES	
B1 Use Hand Tools	
Select and use hand tools	B1-1
Perform hand tool maintenance	B1-6
Store hand tools	B1-6
 B2 Use Power Tools	
Select and use power tools	B2-1
Perform power tool maintenance.....	B2-6
Store power tools.....	B2-7
 B3 Use Measuring Equipment	
Select and use measuring equipment	B3-1
Perform maintenance on measuring equipment	B3-2
Store measuring equipment.....	B3-6
 B4 Use Vehicles and Motorized Equipment, Trailers, and Attachments	
Describe the environmental considerations of selecting and using vehicles, motorized equipment, Attachments and trailers.....	B4-2
Describe the maintenance of equipment attachments	B4-3
 LINE C ORGANIZE WORK	
C1 Perform Site Assessments	
Interpret documentation pertaining to site assessment	C1-1
Assess existing site conditions for protection	C1-2
Assess landscape site soils	C1-5
Identify growing media conditions and properties.....	C1-5
Identify existing and proposed grading and drainage patterns	C1-7

C2 Use Documentation and Reference Material

Apply current government legislation and company policiesC2-1
Use catalogues.....C2-3
Use text and field books for referencingC2-4

C3 Maintain Records

Describe examples of additional recordsC3-1
Describe types of shipping and receiving informationC3-2

C4 Participate In Job Planning Activities

Identify and prioritize tasksC4-1
Consider safety requirementsC4-4
Locate utilities.....C4-5
Verify materials.....C4-5
Verify practices adhere to industry standards.....C4-6
Identify and schedule cleanupC4-6

C5 Order Materials

Identify required materialsC5-1
Describe the considerations when ordering materialsC5-1
Describe the process for keeping recordsC5-2
Identify required documents to prevent delaysC5-3

C6 Organize Materials and Equipment

Receive plants and materialsC6-1
Handle substandard plants and materialsC6-2

LINE D PARTICIPATE IN MARKETING AND SALES

D1 Control Inventory

Describe the process for identifying and counting inventory.....D1-1
Describe the process for sorting and managing inventoryD1-3
Describe the considerations for restocking orders.....D1-3

D2 Sell Products and Services

Describe considerations for client education and advisingD3-1
Describe merchandising and marketing of products and servicesD3-4
Describe considerations for handling payments for products and services.....D3-8

D3 Maintain Customer Relations

Describe methods of maintaining customer relationsD2-1
Describe methods of maintaining customer recordsD2-5
Identify stakeholders for future inquiries.....D2-8

LINE F APPLY HORTICULTURAL PRACTICES

F2 Identify Plants and Plant Requirements

Recognize plants suitable for common tropical, floral and interior landscape situationsF2-1
Recognize plants suitable for planting in difficult situations.....F2-3
Identify and describe 90 woody and non-woody plantsF2-5

F4 Prune Plant Materials

Select and use tools and equipment F4-1
Hazards and safe work practices F4-4
Describe tree pruning considerations F4-4
Recognize factors contributing to tree failure F4-13
Risks associated with trees F4-22
Describe basic plant morphology, anatomy, and physiology with regard to pruning trees F4-31
Perform pruning techniques for young and established trees F4-34
Describe training techniques for young trees F4-41
Describe timing of pruning trees F4-43
Describe compartmentalization F4-47
Organize and dispose of pruned material F4-50

F5 Manage Pests, Diseases and Invasive Species

Select and use tools and equipment F5-2
Describe conditions that contribute to plant stress F5-2
Describe common pests F5-6
Describe basic arthropod biology F5-7
Describe the characteristics of invertebrate pests F5-20
Describe the biology and characteristics of pathogens F5-31
Describe the damage and management of vertebrate pests (Birds & mammals) F5-45
Describe basic weed biology, common characteristics, and impacts F5-49
Describe established methods for controlling pests (IPM) F5-56
Establishing treatment methods for controlling pests F5-78
Describe the integrated strategies for pest control F5-87
Apply treatment methods F5-99
Describe safe disposal of products and materials F5-99
Appendix 1 Common plant pathogenic fungi F5-100
Glossary F5-103

LINE G APPLY ENVIRONMENTAL PRACTICES

G1 Practice Environmental Stewardship

IPM Implications on Environmental Stewardship G1-1
Identify opportunities for stewardship related to pest and disease management G1-2

G4 Practice Water Stewardship

Describe practices that promote water stewardship G4-1
Describe irrigation system auditing and scheduling procedures G4-10

LINE I INSTALL HARDSCAPE

I1 Install Landscape Structures

Select and use hand and power tools I1-1
Select and use equipment I1-2
Identify products and materials used in feature construction I1-3
Prepare for the installation of landscape structures I1-4
Construct landscape structures I1-7
Apply protective products I1-18
Clean up site I1-18

I4 Install Irrigation Systems

Select and use hand tools, power tools, and equipmentI4-2
Identify hazards and perform safe work practicesI4-5
Apply irrigation terminology.....I4-9
Examine factors that affect irrigation designI4-16
Identify irrigation systemsI4-27
Identify irrigation componentsI4-27
Prepare for installationI4-38
Install irrigation systems.....I4-39
Program the control systemI4-43
Verify installation and operationI4-43
Clean up siteI4-43

I5 Install Water Features

Describe types of water features.....I5-1
Select and use hand tools, power tools, and equipmentI5-3
Identify hazards and perform safe work practicesI5-3
Interpret codes, regulations, and documentation.....I5-4
Describe site preparation to install water featuresI5-6
Describe procedures to install water featuresI5-7
Explain maintaining water levelsI5-14
Describe the factors for finalizing installationI5-14
Describe site cleanup.....I5-16

I6 Install Low Voltage Landscape Lighting

Select and use hand tools, power tools, and equipmentI6-2
Describe preparation for installation of low voltage landscape lightingI6-2
Describe components of low voltage landscape lightingI6-7
Describe lighting adjustmentsI6-9
Describe site cleanup.....I6-10

LINE J INSTALL SOFTSCAPE

J7 Install Interior Landscape Plants

Select and use hand tools and equipmentJ7-1
Identify hazards and safe work practicesJ7-1
Prepare plant materialsJ7-3
Protect interior furnishings and surfacesJ7-6
Prepare planting areas.....J7-7
Stage plant material.....J7-9
Lay out plant materialsJ7-10
Plant interior landscape plantsJ7-10
Verify plant installationJ7-11
Clean up siteJ7-12

LINE L MAINTAIN HARDSCAPE

L2 Maintain Landscape Structures

Inspect structures for defects and hazardsL2-1
Describe maintenance procedures for landscape structuresL2-2

L5 Maintain Irrigation Systems

Identify hazards and perform safe work practices..... L5-2
Identify irrigation systems..... L5-2
Describe maintenance requirements..... L5-3
Describe determining system functionality L5-5
Describe problems L5-6
Describe solutions L5-6
Describe the considerations and procedures for determining water quality and availability L5-6
Identify factors that determine irrigation rates and methods..... L5-7
Describe water stewardship practices L5-7

L6 Maintain Water Features

Identify hazards and perform safe work practices..... L6-1
Interpret codes, regulations, and documentation L6-2
Describe types of water features L6-2
Describe the procedures and products used to maintain water features L6-2
Describe inspection of water features for defects..... L6-4
Describe the process for charging systems and replacing pumps L6-4
Describe the process for setting and resetting timers L6-5
Describe the process for removing and protecting plants and fish for cleaning and winterization ... L6-5
Describe the process for draining and refilling features..... L6-5
Describe the process for running systems to ensure functioning..... L6-5
Describe the process for inspecting and testing water conditions L6-5
Describe the process for testing ground fault circuit interrupter (GFCI) L6-6
Describe the process for cleaning of components..... L6-6
Describe cleaning of water features L6-6
Describe amending water L6-6
Describe the process for winterizing of water features..... L6-6
Troubleshoot problems with water features L6-6

L7 Maintain Landscape Lighting

Landscape Lighting Maintenance Programs..... L7-1
Maintain Landscape Lighting preparation..... L7-2
low voltage landscape lighting maintenance procedures..... L7-3
Describe visual inspection of lighting components..... L7-3
Describe adjustment of lighting components L7-5
Describe cleaning and clearing of lighting components..... L7-5

L8 Practice Snow And Ice Control

Red Seal Occupational Standard for Snow and Ice Control L8-2

L9 Repair Hardscape

Recognize damage to hardscapes L9-1
Describe minor repairs L9-5

LINE M MAINTAIN SOFTSCAPE

M2 Maintain Interior Softscape

Select and use hand tools and equipmentM2-1
 Identify hazards and describe safe work practicesM2-2
 Identify interior plants and their needs.....M2-5
 Identify pests and diseases.....M2-7
 Perform visual inspectionM2-9
 Discuss irrigation and fertilization of plantsM2-10
 Discuss cultivation and amendment of growing media.....M2-11
 Discuss cleaning of foliage and containersM2-13
 Discuss seasonal plant replacement.....M2-13
 Discuss protection of interior furnishings and surfacesM2-14
 Discuss pruning of interior plantsM2-15
 Discuss managing growth for site conditionsM2-15
 Discuss movement and rotation of plantM2-16
 Appendix 1: Plant Lighting FundamentalsM2-17

M5 Repair Softscape

Describe management of damaged plant materialM5-2
 Describe reasons for replacing interior and exterior plants.....M5-9
 Describe repair of natural and manufactured edges.....M5-12
 Describe repair and adjustment of staking and guying materialsM5-13
 Describe repair of grading and drainageM5-14
 Describe reasons for replacing growing mediaM5-15
 Describe repair of inorganic mulch.....M5-17

APPENDICES

GlossaryAppendix 1
 Red Seal Landscape Horticulturist Interprovincial Exam Plant List.....Appendix 2
