

# Practical Landscape Horticulture

## Book B: Applies Horticultural Principles

### TABLE OF CONTENTS

#### APPLIES HORTICULTURAL PRACTICES

##### **Chapter 1 Identifies Plants and Plant Requirements (RSOS B-6.01)**

###### **Part One: Practice Basic Plant Science**

1.1 Plant morphology .....	B1-3
1.2 Describe the external anatomy of stems .....	B1-3
1.3 Describe leaf morphology and external anatomy .....	B1-8
1.4 Describe parts of the flower .....	B1-16
1.5 Identify typical inflorescences .....	B1-18
1.6 Identify fruit types .....	B1-22
1.7 Describe seed characteristics and development .....	B1-25
1.8 Identify organ modifications .....	B1-27
1.9 Describe the microscopic anatomy of plants .....	B1-30
1.10 Describe plant organ internal anatomy .....	B1-35
1.11 Describe plant growth .....	B1-41
1.12 Describe life cycle stages of angiosperms and gymnosperms .....	B1-43
1.13 Describe water movement through a plant .....	B1-48
1.14 Describe basic principles of photosynthesis .....	B1-51
1.15 Explain the influence of environmental factors on plant physiology .....	B1-53
1.16 Describe the growth response to external stimuli .....	B1-58
1.17 Describe basic growth responses to plant hormones .....	B1-60

###### **Part Two: Identify Plants and Plant Requirements**

1.18 Classify a range of plant materials commonly used in commercial horticulture .....	B1-65
1.19 Examine plant characteristics through visual, touch and other senses .....	B1-72
1.20 Employ correct naming and plant identification terminology .....	B1-73
1.21 Name the plant family for each plant identified .....	B1-80
1.22 Use a dichotomous key for plant identification .....	B1-81
1.23 Identify and describe woody and non-woody plants .....	B1-85
1.24 Red Seal Landscape Horticulturist Interprovincial Exam Plant List .....	B1-87
1.25 Recognize a range of plant materials commonly used in horticulture .....	B1-93
1.26 Explain plant hardiness zones .....	B1-97
1.27 Identify weeds .....	B1-99
1.28 Describe the characteristics of weeds .....	B1-101
1.29 Recognize plants suitable for common tropical, floral, and interior landscape situations .....	B1-103
1.30 Recognize plants suitable for planting in difficult situations .....	B1-104
1.31 Describe native plants common to the horticulture industry .....	B1-107
1.32 Describe seasonal plants common to the horticulture industry .....	B1-112
1.33 Describe plants suitable for green infrastructure projects .....	B1-114
1.34 Describe plants suitable for edible landscapes .....	B1-116

##### **Chapter 2 Manages Plant Health and Growing Conditions (RSOS B-6.02)**

2.1 Select and use tools and equipment .....	B2-1
2.2 Describe the conditions that affect plant health .....	B2-2
2.3 Recognize basic practices that affect plant health .....	B2-9
2.4 Visually inspect growing media .....	B2-15
2.5 Use appropriate terminology to describe plant stress .....	B2-19

# Practical Landscape Horticulture

## Book B: Applies Horticultural Principles

2.6 Examine plant organs for evidence of stress .....	B2-26
2.7 Collect samples to prepare for testing .....	B2-44
2.8 Describe types of tests .....	B2-47
2.9 Interpret test results .....	B2-49
2.10 Develop a plan for implementing corrective measures .....	B2-50
2.11 Determine factors for plant selection and placement .....	B2-51
2.12 Amend growing conditions to meet plant requirements .....	B2-53
2.13 Measure and apply fertilizer and amendments .....	B2-55

### Chapter 3 Prunes Plant Material (RSOS B-6.03)

#### Part One: Prune Shrubs, Groundcovers, and Vines

3.1 Select and use tools and equipment .....	B3-2
3.2 Identify hazards and safe work practices .....	B3-7
3.3 Demonstrate safe working practices and operation of common pruning equipment and tools.....	B3-8
3.4 Describe shrub, vine, and groundcover pruning considerations .....	B3-12
3.5 Demonstrate pruning techniques for young and established shrubs, groundcovers, and vines.....	B3-21
3.6 Describe timing of pruning shrubs, vines, and groundcovers .....	B3-27

#### Part Two: Prune Trees

3.7 Describe tree pruning considerations .....	B3-31
3.8 Recognize factors contributing to tree failure .....	B3-40
3.9 Risks associated with trees .....	B3-48
3.10 Describe basic plant morphology, anatomy, and physiology with regard to pruning trees .....	B3-57
3.11 Perform pruning techniques for young and established trees .....	B3-60
3.12 Describe training techniques for young trees .....	B3-67
3.13 Describe timing of pruning trees.....	B3-70
3.14 Describe compartmentalization.....	B3-73

### Chapter 4 Manages Pests, Diseases, and Invasive Species (RSOS B-6.04)

4.1 Select and use tools and equipment.....	B4-3
4.2 Hazards and safe work practices .....	B4-3
4.3 Describe conditions that contribute to plant stress .....	B4-5
4.4 Describe common pests.....	B4-9
4.5 Describe basic arthropod biology .....	B4-10
4.6 Describe the characteristics of invertebrate pests .....	B4-23
4.7 Describe the biology and characteristics of pathogens .....	B4-34
4.8 Describe the damage and management of vertebrate pests (birds & mammals).....	B4-48
4.9 Describe basic weed biology, common characteristics, and impacts.....	B4-52
4.10 Describe established methods for controlling pests (IPM).....	B4-59
4.11 Establishing treatment methods for controlling pests .....	B4-81
4.12 Describe the integrated strategies for pest control.....	B4-90
4.13 Apply treatment methods .....	B4-101
4.14 Describe safe disposal of products and materials .....	B4-102
4.15 Discuss the implications of pest management .....	B4-102
4.16 Identify the factors for selecting and applying treatment methods.....	B4-109
4.17 Describe pest control products, formulations, and application equipment.....	B4-110
4.18 Identify regulated versus non-regulated pests.....	B4-113
4.19 Identify quarantine protocols .....	B4-115
4.20 Prepare samples for lab testing .....	B4-118
4.21 Develop a diagnostic checklist .....	B4-118
4.22 Develop an IPM program.....	B4-119

# Practical Landscape Horticulture

## Book B: Applies Horticultural Principles

4.23 Practical Activity 1: Develop an IPM program proposal.....	B4-123
4.24 Glossary.....	B4-125

### **APPLIES ENVIRONMENTAL PRACTICES**

#### **Chapter 5 Practices Environmental Stewardship (RSOS B-7.01)**

5.1 Define environmental stewardship.....	B5-2
5.2 Describe standards for environmental protection.....	B5-4
5.3 Discuss opportunities for stewardship related to site assessment and preparation.....	B5-5
5.4 List benefits of plants.....	B5-7
5.5 Identify opportunities for stewardship relating to landscape maintenance and installation.....	B5-9
5.6 IPM implications on environmental stewardship.....	B5-14
5.7 Identify opportunities for stewardship related to pest and disease management.....	B5-14
5.8 Identify opportunities for stewardship related to green infrastructure and biodiversity.....	B5-20

#### **Chapter 6 Practices Biodiversity Enhancement (RSOS B-7.02)**

6.1 Define biodiversity.....	B6-1
6.2 Ensuring and practicing biodiversity within landscapes.....	B6-5
6.3 Describe selection of plants to ensure diversity within landscapes.....	B6-7
6.4 Describe a variety of habitats that support a range of organisms.....	B6-10
6.5 Describe bio-diverse enhancement strategies.....	B6-12

#### **Chapter 7 Practices Soil Stewardship (B-7.03)**

7.1 Describe factors of soil formation.....	B7-2
7.2 Define soil quality.....	B7-9
7.3 Distinguish between soil profile horizons.....	B7-10
7.4 Explain the physical properties of soil and soilless media.....	B7-15
7.5 Describe the behaviour of water in soil.....	B7-30
7.6 Examine the types and functions of soil biota.....	B7-39
7.7 Explain the role of organic matter in soil.....	B7-43
7.8 Describe composting considerations.....	B7-45
7.9 Describe how soil colloids determine soil chemical properties.....	B7-52
7.10 Describe mineral nutrients in soil.....	B7-55
7.11 Describe the effect of pH on soil properties.....	B7-65
7.12 Describe the effect of salinity and sodicity on soil properties.....	B7-70
7.13 Summarize nutrient management.....	B7-75
7.14 Discuss site remediation.....	B7-82
7.15 Sample soils.....	B7-84
7.16 Discuss the importance of preserving soil health.....	B7-91
7.17 Identify the considerations when selecting soil amendments.....	B7-95

#### **Chapter 8 Practices Water Stewardship (RSOS B-7.04)**

8.1 Describe elements of water stewardship.....	B8-1
8.2 Describe procedures for environmental water sampling.....	B8-8
8.3 Describe practices that promote water stewardship.....	B8-8
8.4 Describe irrigation system auditing and scheduling procedures.....	B8-17
